A Flash Flood Watch is in effect until 7 PM Thursday, for much of West Central Texas.

Flash Flood Watch Through 7 PM Thursday

An additional 1-2 inches of rain with isolated totals up to 4 inches

Weather Forecast Office
Austin/San Antonio, TX
Issued Oct 16, 2018 3:20 PM CDT

Hazards

Flash Flood
Watch

A Flash Flood Watch continues in effect through 7 pm Thursday for portions of the Rio Grande Plains and the Hill Country. Rainfall amounts of 1 to 2 inches are expected with isolated spots of up to 4 inches possible. This will lead to renewed flash flooding due to saturated soils from recent heavy rains making runoff more rapid.

Hazardous Weather

Periods of showers are expected across most areas. Locally heavy rains are possible mainly across the Edwards Plateau and western Hill Country. Renewed flash flooding is possible and a Flash Flood Watch remains in effect until 7 pm on Thursday for areas west of I-35. River flooding will continue due to recent heavy rains. Unseasonably cold temperatures linger with highs mainly in the 50s.

A Flash Flood Watch remains in effect for parts of the region as it remains very sensitive to additional rainfall. River flooding will be possible later this week as water continues to drain into lower portions of the Colorado and Guadalupe Rivers.
